PROFESSIONAL SUMMARY

Software Engineering undergraduate student at Pontifical Catholic University of Minas Gerais (PUC Minas), focused on software engineering and web application development. Possesses a strong theoretical and practical foundation in programming logic, Object-Oriented Programming (OOP), and RESTful API architecture through academic and personal software projects.

EDUCATION

Pontifical Catholic University of Minas Gerais (PUC Minas) In Progress

Bachelor of Science in Software Engineering

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript.
- **Web & Frontend Development:** HTML5, CSS3, Bootstrap, React (currently learning).
- **Backend & Frameworks:** Spring Boot, REST API Architecture, CRUD Operations.
- **Databases & Data Persistence:** JSON file storage and data manipulation.
- **Tools & Concepts:** Git, GitHub, Visual Studio Code, Object-Oriented Programming (OOP).

ACADEMIC & PERSONAL PROJECTS

BankPy — Banking System Python, JSON

Personal application built to strengthen core programming logic, modularization, and code architecture. Features complete banking transactions, input validation routines, and local data persistence using JSON format.

MeuBolso — Personal Finance Platform Web Development

Web development project aimed at personal financial management, focusing on core functionality implementation, business logic structuring, and building an accessible web solution.

Personal Portfolio Web Development

Personal site designed to showcase academic journey, technical skills, and software project portfolio, built with strong attention to responsive design and user experience.

ACADEMIC EXPERIENCE

Active participation in practical individual and team-based university projects, applying core software engineering principles, distributed version control (Git/GitHub), clean code guidelines, and collaborative development techniques.
